Marketing levers

Electroo's goal is to turn its customers into responsible consumers of energy and be worth acquiring and welcoming new prospects to the process.

**Identified Need:** Make it possible for consumers to reduce their carbon footprint and reduce their energy bill based on detailed data and using the digital and new technologies.

"Sell more to people who want to consume less"

**Wi-Fi centralized Plugs**

**Full accessibility, control**

Via the mobile Application

# Solution

Basic

7

1

5 plug-ins to install on infrastructures that collect information, detect uses.

2

Real-time tracking

3

Detailed tracking by devices

4

Energy threshold

5

Detailed report

6

Optimization of renewable energy sources

# Solution

## Environment and development

# Agile: Process

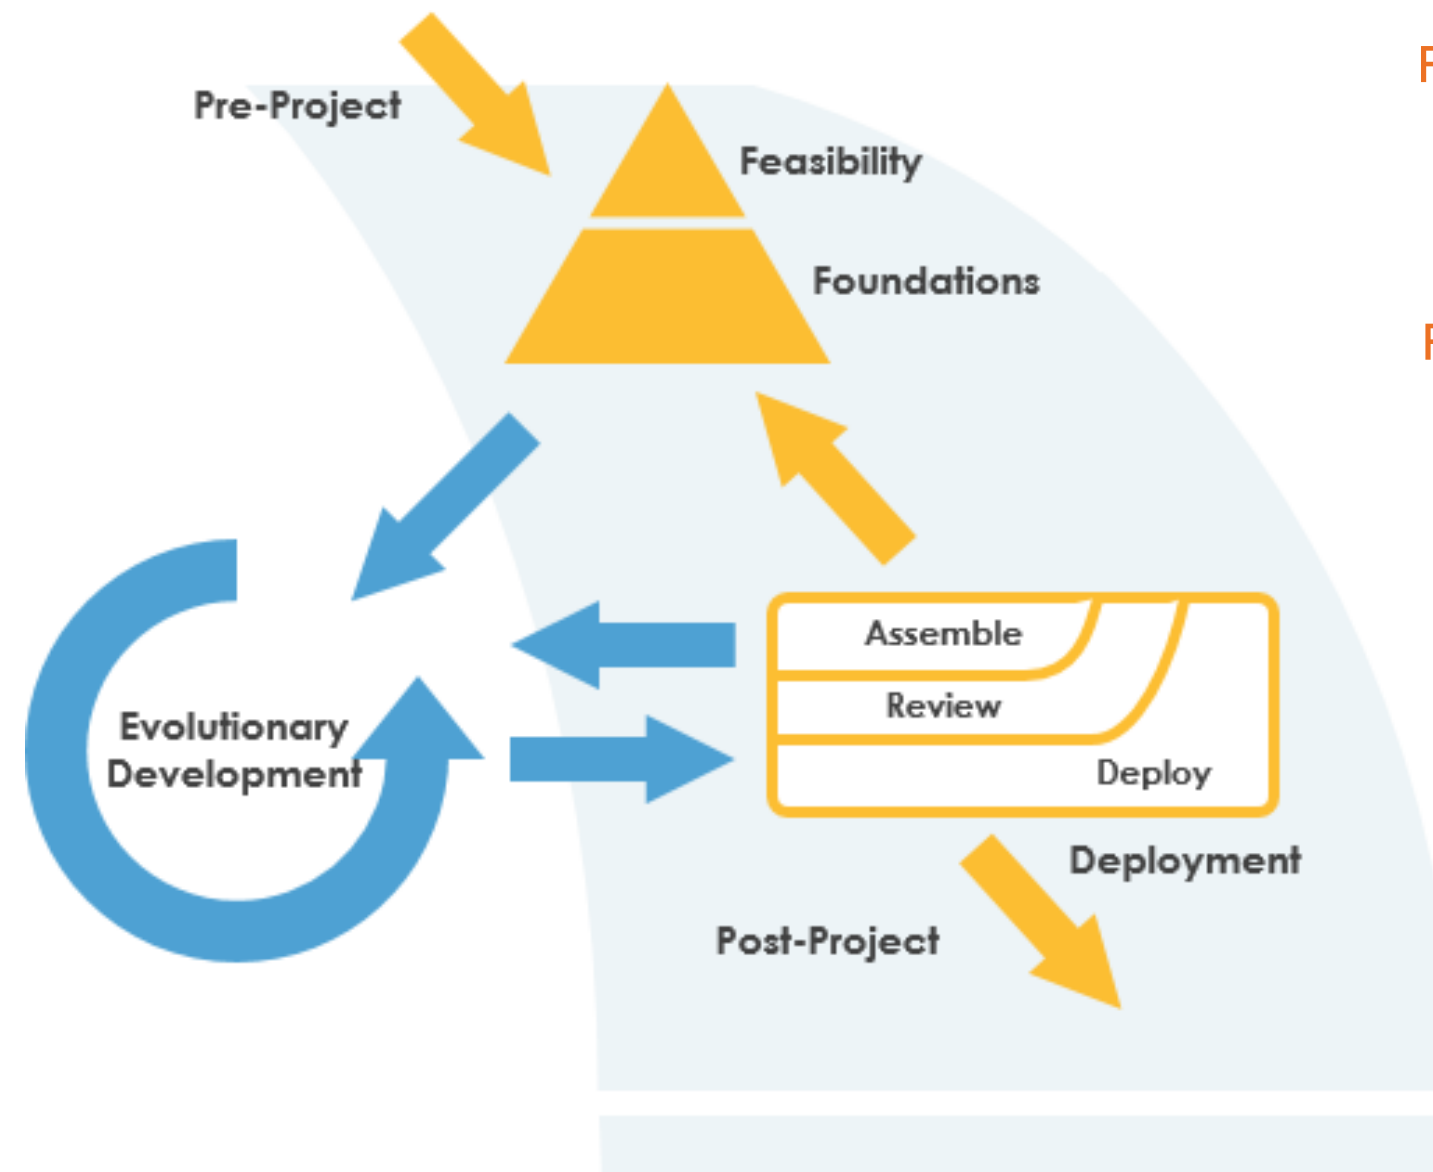

15

We chose this method to keep our process up to date and to keep enhancing it during the whole process. Moreover, this agile method allows a quick identification and resolving of malfunctions.

## Process

**Pre-Project:** listed all the ideas that seemed relevant

**Evolutionary Development:** Realise our deliverables through iterations. We manage the project through prioritisation and through Timeboxes

**Feasibility:** Assessment of the project technically and economically

**Foundations:** arrive here with 1 selected project. We detail how we are going to proceed to concretise it

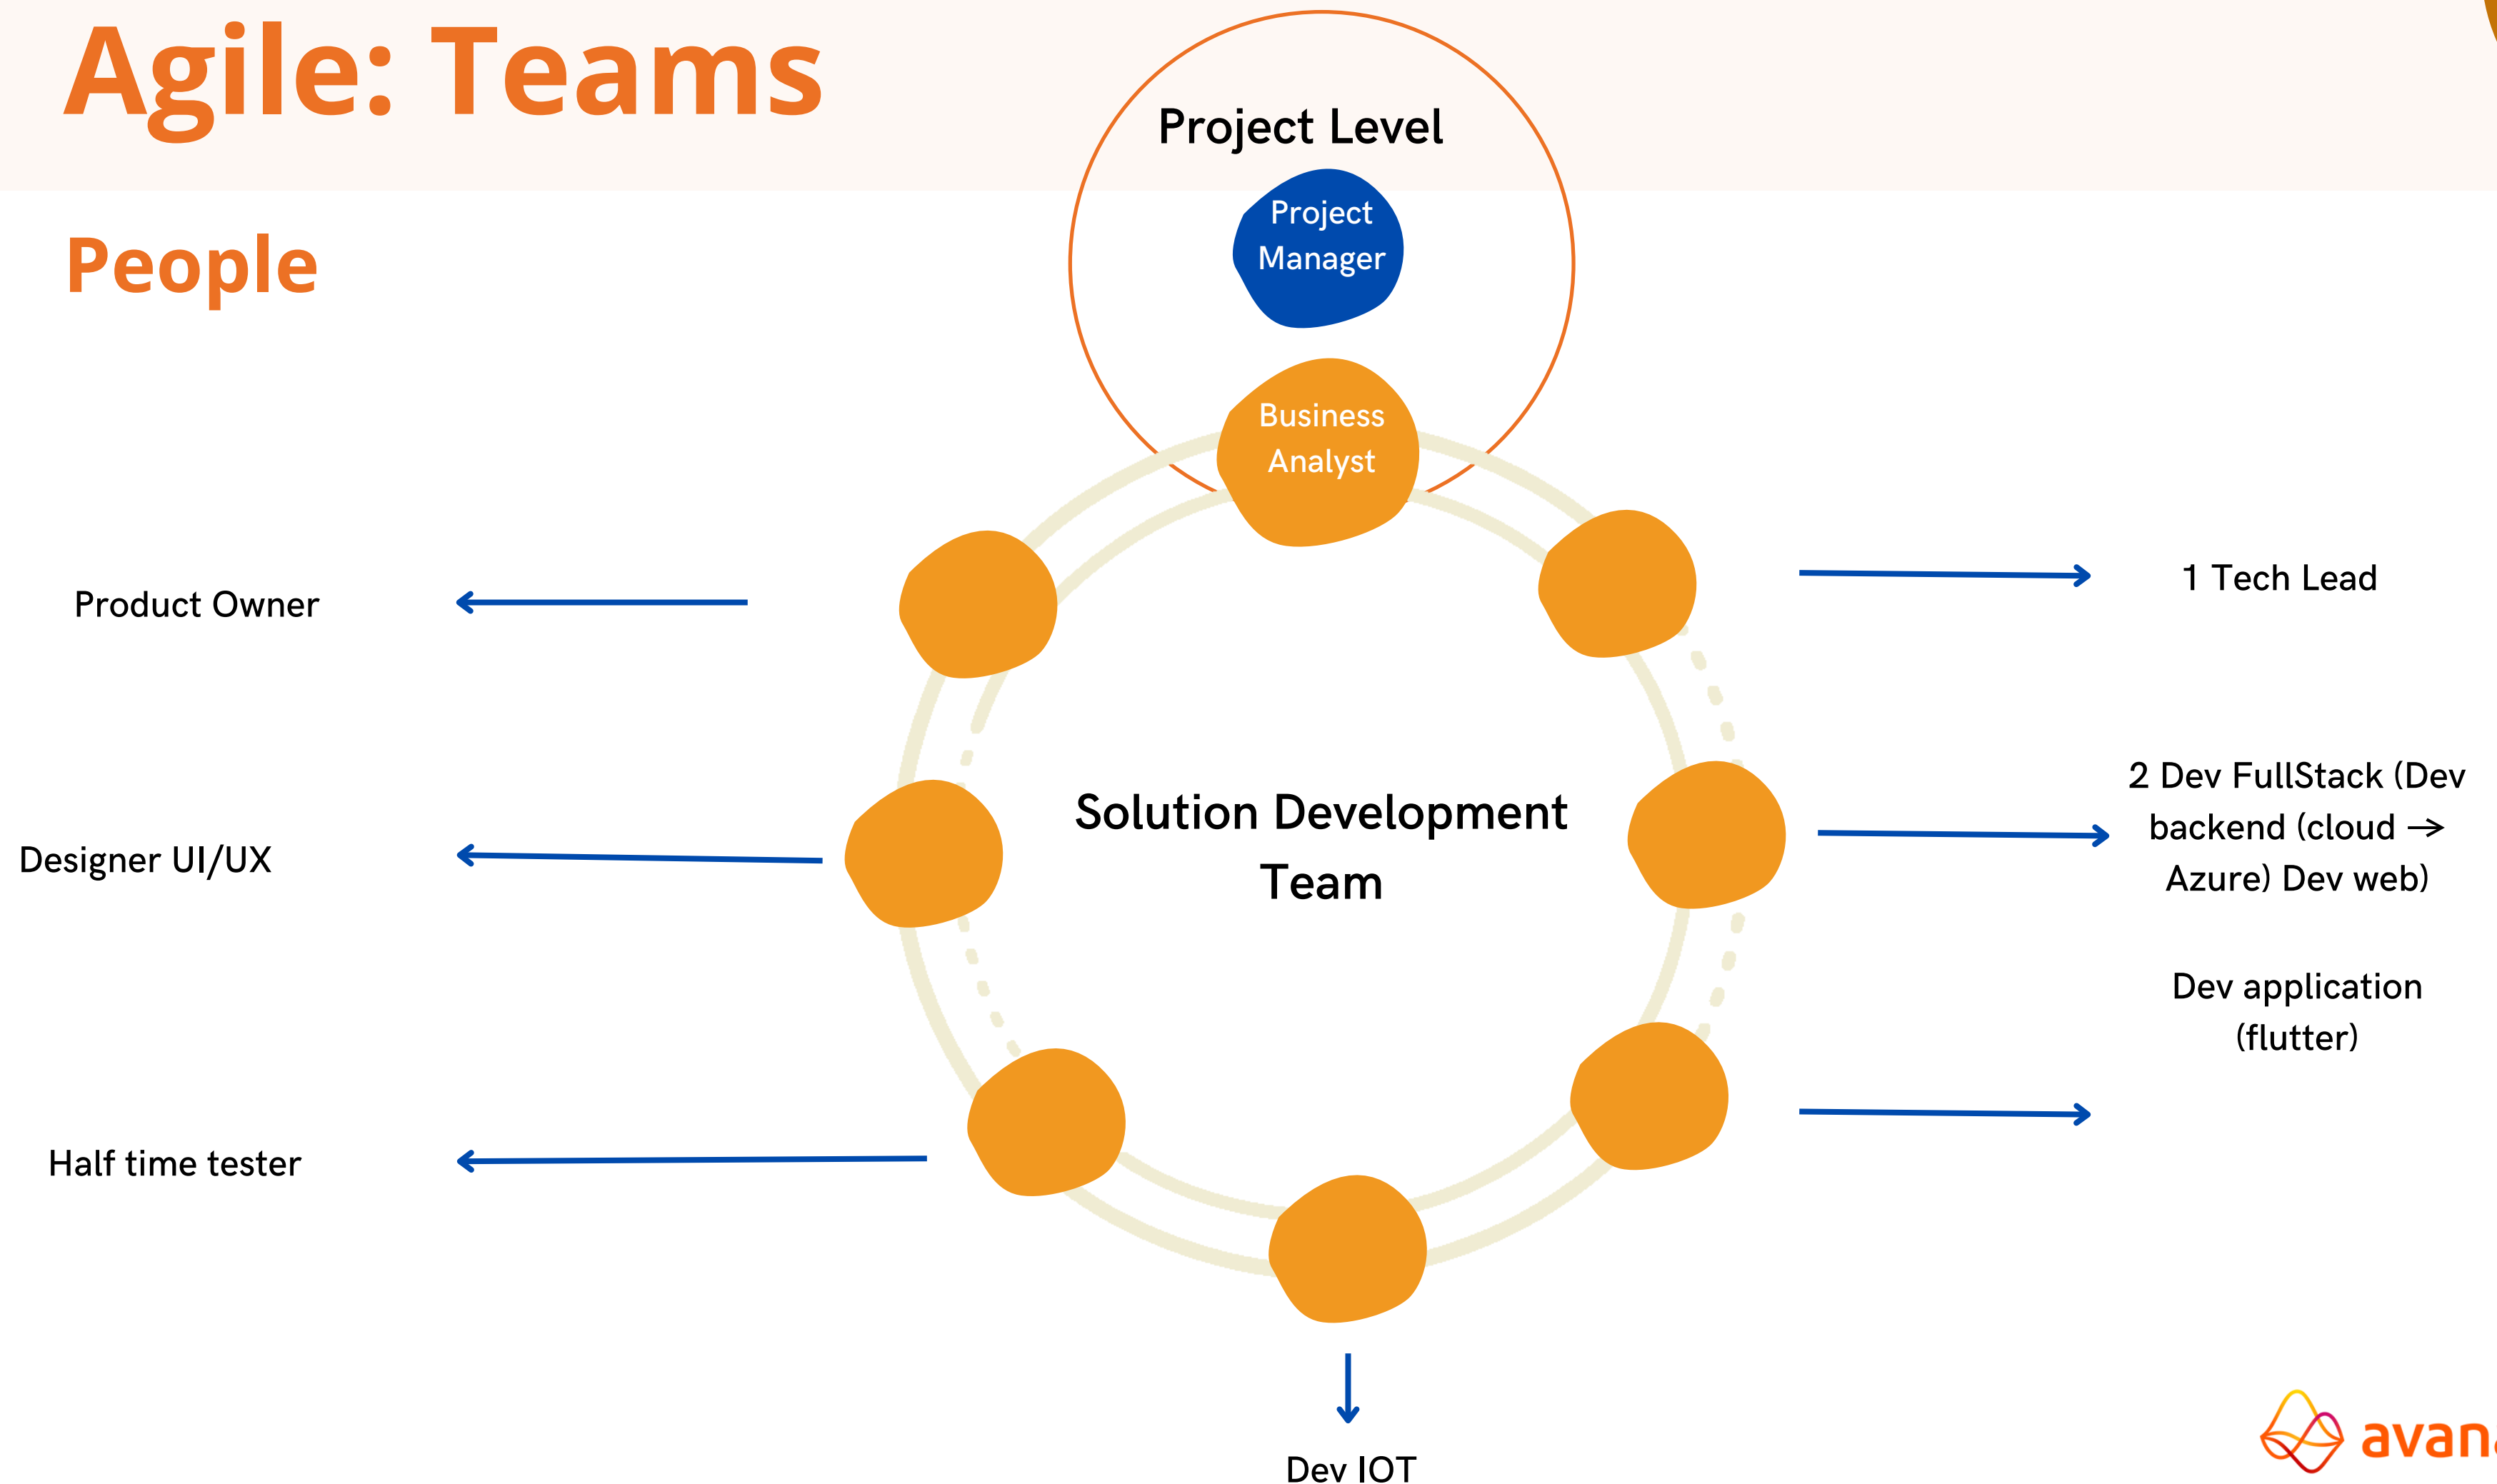

**Deployment:** we decide that we are able to deploy the project and put it through production and sales

**Post-Project:** measure the results and profitability of the project

3

4

## PHASE 1

### POC

Test the basic mechanic of the solution : connect equipments to the App

## PHASE 2

Development of the solution architecture and define a Beta version with 5/11 functionalities

## PHASE 3

Test the 11 functionalities of the solution. Divide by Timeboxes of 2 weeks with 2,5 functionalities per Timebox, iteration and with 1 week of tests each 2 sprints. The result will be a version Beta.2 with 6 more functionalities..

## PHASE 4

Tests over the complete solution

Workshop to refine the Need in order to refine the Solution

# Budget

TEAM	PRICE (ADR)	DURATION (6 MONTHS)	TOTAL
Scrum Master	820€	Fulltime : 125 days	102 500€
Product Owner	Client side	Fulltime	//
Business Analyst	700€	Fulltime	87 500€
Tech Lead	880€	Fulltime	110 000€
2 FullStack Developer	750€/dev	Fulltime	93 750€*2 = 187 500€
Mobile Developer	680€	Fulltime	85 000€
IoT Developer	640€	Fulltime	80 000€
Tester	400€	part-time	25 000€
UI/UX Designer	660€	Fulltime	82 000€

Total price  
(6 months):  
**760 250€**

# Budget

For the development part, a set of Microsoft tools will be needed.

All the tools come with the following licensing program: Microsoft Customer Agreement (MCA)

Estimated price per month: 400€

For 6 months: **2400€**

Total HR+Tech : **764 650€**

## Non-exhaustive list of tools :

- Azure App Service
- Azure API Management
- Azure Container Registry
- Azure DevOps
- Azure Load Testing
- Azure Load Balancer
- Azure Technical Support
- ...

# Budget

Here are some tools that you will need to have once the system is deployed.

CATEGORY	SERVICE TYPE	DESCRIPTION	PRICE
Storage	Storage Accounts	Premium Block Blob Storage, Hot Access Tier, 10 TB Capacity - Pay as you go	1813,80€
Internet Of Things	Azure IoT Hub	Basic Tier, B3: Unlimited devices, 300,000,000 msgs/day, \$625.00/mo, 1 IoT Hub Units	588,60€
Database	Azure SQL Database	Elastic Pool, vCore, Business Critical, Provisioned, Standard-series (Gen 5), RA-GRS Backup Storage Redundancy, 6 x 500 GB Long Term Retention	2266,51€
Database	Azure Cache for Redis	Enterprise tier; x1 scale factor (capacity 2) x 1 E10 instances x 1 Month, Pay as you go, Software IP cost is included	1083,47€
Compute	Azure Kubernetes Service (AKS)	3 D2 v3 (2 vCPUs, 8 GB RAM) x 1 Month (Pay as you go), Linux; 1 managed OS disk - S4	232,58€
Networking	Load Balancer	Basic Load Balancer is free of charge	0€
Web	API Management	Standard tier, 1 unit(s), 1 Month	646,71€

Estimated price per month: **7574€**

Here are product from firms our client are working with. The quality is EU certified. We could provide more informations and contact.

# Marketing levers

The goal of these levers is to gain loyalty of current customers or acquire new ones.

## Loyalty

- Personalised and targetted E-mailing campaign
- Rewarding system: invite customers to create an account where they accumulate points when they successfully adopt habits that reduce their carbone footprint (energy consumption)
- Organise challenges and giveaways

## Acquisition

- Awareness E-mailing campaign
- Ads placements on social networks
- Blog articles
